MERO-TSK International GmbH & Co. KG is acting worldwide in the fields of building constructions, aircraft maintenance docking systems, floor systems and exhibition systems.

**Construction Systems** implements architecturally distinctive buildings with modular system components as supporting structure. Areas of specialization are on wide span roofs and filigree facades as well as constructive implementation of the various requirements for glass architecture.

**Airport-Technik** creates maintenance service centers and working platforms for international airports.

**Floor Systems** provides various types of access and hollow floors with accessory equipment for office buildings, computer and clean rooms, telecommunication, airconditioning technology, data center, production plants, control rooms and refurbishing.

**Exhibit Systems** designs and manufactures innovative systems for trade fairs, exhibitions and shop fitting and distributes them worldwide.

MERO was founded in 1928 by Dr. Ing. Max Mengerlinghausen, the pioneer of the modular construction and the derived space frame. In 2004, MERO was integrated in the worldwide active Group owned by family Tröster (TSK). Since then all MERO product lines have been progressively developed.
